BRUNSWICK

THE MOST PRESTIGIOUS NAME IN BILLIARDS

In 1845, John Moses Brunswick set out to build the world's most trusted brand in billiard tables. Applying his formidable craftsmanship, a mind for innovation, and a passion for the game, he created a company synonymous with quality and billiard excellence.

Since then, Brunswick has evolved the sport of billiards and set lasting standards for years to come. We continue the tradition of creating tables that are not only engineered for premium performance, but are designed to be works of art.

Brunswick Billiards tables have been the choice of presidents, sports stars, celebrities, and industry leaders. A Brunswick table creates a natural place to gather, laugh, enjoy the company of others, and make strong, lasting connections.

BRUNSWICK BILLIARD TABLES

Today's Brunswick Billiards tables are masterpieces of craftsmanship, design, and innovation, continuing the legacy of excellence begun almost two centuries ago.

THE GAME CHANGERS

Brunswick's legacy is derived from building the best. If you look inside a Brunswick table, this becomes clear as you see innovation after innovation. Every extra step we take in the building process ensures we achieve superior accuracy and consistency in our tables. We are proud to stand behind the quality, materials and workmanship of every product that carries the Brunswick name.

OUR HIGH PERFORMANCE™ NUT PLATES

Our exclusive nut plates allow for the application of 70% more torque to each connection, ensuring a solid, seamless transition between rail and slate that enhances performance and playability.

HARDENED DOME WASHER

To maintain the integrity of the rail-to-slate connection long term, a hardened domed washer is utilized which provides constant tension between the rail and the slate, and prevents twisting or loosening over time.

SUPERSPEED® CUSHION RUBBER

Brunswick SuperSpeed cushions have set the standard for over 90 years with a proprietary rubber formulation and shape. We start with 100% gum rubber, add a synthetic rubber that is derived from a formula created by B. F. Goodrich Co. in the 1930's, mix in the requisite bonding materials and then extrude a high grade cushion rubber that provides accuracy, control and rail consistency.

HIGH PRESSURE BONDING

Precision is critical and cushion rubber bonding and placement are essential to the overall performance. Brunswick achieves superior accuracy and consistency through proprietary pneumatically controlled machines that bond the cushion rubber to the rails for a precision fit that doesn't vary.

ACCURATE NOSE HEIGHT

Banking and rebound accuracy rely on the nose height of the table's cushion rubber. Brunswick's automated, pneumatically controlled machines precisely place the cushion rubber ensuring consistent nose height all around the table that meets the 64% of a 2.25" diameter ball standard.

SOLID HARDWOOD RAILS

Brunswick rails are made of solid hardwood. The rails are machined to exacting standards and provide a solid foundation behind the cushion rubber to ensure exceptional accuracy and performance.

MACHINE RECESSED AREA

A machined recess groove is cut into the rail to allow the rail cloth to be securely stapled many times over and not interfere with the rail attachment to the slate while ensuring the nose height of the cushion is not affected no matter the thickness of the cloth.

STATE-OF-THE-ART FINISHING

Brunswick uses the best materials possible and undergoes the most demanding and time-consuming process to achieve the optimal billiard table finish. From working with world class furniture finish suppliers to conducting a 12-step or more finishing process, Brunswick cuts no corners. The evidence is in the end results... Go Ahead and Feel It!

SOLID WOOD DOVETAIL SUPPORT

Solid wood cross supports utilize dovetail joinery to connect the table frame at each slate joint. This provides superior performance, supporting the slate joints as if the slate was one piece.

ROCK-SOLID AND READY TO INSTALL

Brunswick tables come ready to assemble. We utilize machine nut and bolt construction techniques to achieve a rock solid fine furniture product that is easy to assemble anywhere – in a home, business or recreation center.

KILN-DRIED, STAINED, AND SEALED

Brunswick tables are built to last for generations. All solid wood materials are kiln-dried to a 6-8% moisture level, then stained and sealed to keep moisture out. A durable furniture finish completes the look of each product.

BRUNSWICK CERTIFIED SLATE

Brunswick slate must pass rigid quality requirements before it receives a "Brunswick Certified" sticker. Brunswick slate is diamond-honed, precision-machined and leveled to within 10/1000th of an inch which is 3X the Billiard Congress of America standard of 30/1000th. Brunswick slate is cured for an extended period of time to assure stability and is checked for flatness on the top and bottom at least four times through the machining and curing process. Every set of Brunswick slate is quality inspected and certified to provide a lifetime of playability.

GOLD CROWN VI

The Gold Crown VI continues Brunswick's tradition of excellence as the newest edition of the legendary table series. The Gold Crown VI features a familiar design with modern styling. The new, low-profile leg base and hidden stretcher provide a streamlined appearance while the angular canted leg emphasizes the clean lines. The table also features all new rail castings in a brushed nickel finish for a sleek, high-end aesthetic.

THE ONLY GREEN

Brunswick Billiards brings you realistic putting greens designed to complement any setting.

HOW THE ONLY GREEN WORKS

BRUNSWICK'S, THE ONLY GREEN™, PUTTING GREENS OFFER THE MOST REALISTIC COURSE-LIKE CHALLENGES SUITED FOR ANY SPACE!

Our putting greens are designed to complement any setting, whether it's at your home, in the office, at a golf club, or apartment complex rec room; The Only Green putting greens maximize practice time in a minimum amount of space. Choose from The MacDonald, The Maxwell, or The Ross and find the perfect model for you based on your needs, whether it be competitive pricing, break stations, green elevation or the perfect size for your space.

Proprietary putting surface comes in a speed of 12.5 on the stimp meter. Green speed developed by PGA professionals and instructors predominantly recommending a true, tournament speed green.

A trouble-free mechanism housed within The Only Green enables players to set four different elevations of break into the green at each of the break stations. The ends of the green may also be elevated for uphill and downhill putts.

Elevations can be easily adjusted either by hand or from the standing position with any cavity back putter. Simply raise the knob in the vertical slot while sliding the other adjustment knob to the desired A through D break elevation, D being the highest elevation.

“The Only Green surface and adjustability will flat out make you a better putter.”
— Stan Utley,
PGA Instructor

“I've never putted on a better surface. Seriously.”
— Kevin Streelman,
PGA Tour Player
