## AMARI

THE STREAMLINED DESIGN OF AMARI FLOWS TOGETHER EFFORTLESSLY TO FORM THE PRECISELY SCULPTED CAST ALUMINUM FRAME. ALTHOUGH THE STYLING OF AMARI IS REMINISCENT OF AUTHENTIC MID-CENTURY FURNITURE, THERE IS A MORE RESERVED CHARACTER THAT ADAPTS TO A VARIETY OF TASTES. THE LIGHT AND AIRY SHAPE ALLOWS IT TO FIT EFFORTLESSLY INTO BOTH CONTEMPORARY AND CLASSIC ENVIRONMENTS, WHILE THE ABILITY TO CHOOSE BETWEEN WOVEN OR CUSHION SEATING FURTHER EXEMPLIFIES ITS VERSATILITY.

## KITCHEN DESIGN STEPS

### DETERMINE THE LOCATION AND SIZE OF THE AREA FOR YOUR KITCHEN.

### DO YOU WANT SEATING?

We have pedestal table seating and a fire pit table that accommodate up to 6 balcony/counter height stools.

### AFTER YOU HAVE DETERMINED YOUR CABINETS YOU WILL NEED TO ORDER TWO MORE COMPONENTS:

1. The appropriate fascia panel to fit on the front of the cabinet(s) around the front of your gas grill or side burner. Kamado grill, drop-in side burners and sinks do not require fascia panels.
2. An end cabinet side panel to give the cabinets at each end of your kitchen a finished look.

The last thing you need to decide is color. What color finish do you want on your cabinets and fascia panels. We offer 23 color finishes for you to choose from. At gensuncasual.com you see what colors we offer and apply them to the cabinets and countertops.

The countertop is up to you as we could never offer the vast choices that are available in the market. Please select a qualified company that will make and install your countertop to meet outdoor standards.

## CARE & MAINTENANCE

Gensum products are manufactured to give many years of enjoyment. In an effort to help you enjoy the furniture, kitchens and accessories over the years we highly recommend a regular schedule of care and maintenance. Failure to follow these guidelines can void the warranty.

Many fine products to care for the various materials of your furniture are available at your local casual and outdoor furniture dealer or hardware stores. A regular schedule should consist of cleaning the furniture, kitchen cabinets, fabric, woven material and other products at least twice a year but can vary due to usage, exposure and weather conditions. Gensum recommends a mild dish soap and warm water for best cleaning results on the metal frames, fabrics and woven material. Cleaning before storage is highly recommended so that any dirt or pollutants will not cause damage during storage. Difficult or stubborn stains on acrylic fabrics can be cleaned with more aggressive solutions – visit the fabric manufacturer websites for more information. Cleaning more often will not harm the high quality materials used.

### PLEASE NOTE:

- The hardware on swivel rockers, swivel rocking lounge & balcony chairs, and swivel bar & balcony stools should be regularly checked to make sure it is tight. Every 6 months or more often depending upon use.
- All products should be covered if regularly exposed to the sun and weather conditions. If cushions do get wet open zippers and turn cushion so the zipper is facing down. This will allow moisture to properly drain and protect the cushion from mold, mildew and potential staining.
- Some suntan/body lotions and harsh cleaners can be harmful to your furniture, fabrics and woven material. Do not allow any of these products to come in contact with the product as they can cause stains which are not covered under warranty. Gensum only approves a mild dish soap and water mixture for cleaning our products. Other cleaners can void the warranty.
- Extension table slides should be cleaned regularly. A lubricant can also be applied to help the operation of the slides.

- Adjustable glides on chair and table legs are for residential use only. Take special care that these glides are not adjusted to more than 3/16 inch or 0.5 cm of exposed threads as this can cause damage to the glide or leg. Regularly check the glides as they can unscrew when moving products. In commercial use these glides should be firmly tightened at all times. Periodic checks should be performed to confirm that the glides are tight or within the guidelines listed above. The adjustable glides on kitchen cabinet legs should not be adjusted to more than 1 inch or 2.5 cm of exposed thread.
- Cushions are manufactured using premium outdoor materials. These materials can absorb water and will not be damaged if they get wet for a time. However, cushions should not remain wet over a prolonged time as mold or mildew can occur. Protecting cushions from the elements using covers is recommended.
- Outdoor appliances should be operated with care and caution. The fire screen on wood fire pits should be in place whenever a fire is burning. Extreme care should be taken when working with or adding material to the fire bowl – use the tongs provide. DO NOT overload the fire bowl. Protective gloves should be used when handling the fire screen. Gas fire pits and appliances should be operated with extreme care – especially when lighting the burners. DO NOT light the fire pit burner in the high gas setting. Only light the fire pit in the low gas setting. Place a lit match on the glass before turning the gas on. See the appliance instruction manuals for details on proper operation, care and maintenance.

Please make sure that any water that may have accumulated in the tubular extrusions is drained prior to exposure of freezing conditions. Failure to do so can cause water to freeze inside and on the materials causing severe damage, tubing to burst, that is not covered under warranty. The furniture should always be stored in a dry area and an upright position.

The life and enjoyment of your Gensum products can be greatly increased if you use protective covers when the products are not in use or exposed to harsh weather conditions. Do not allow covers to freeze on the product as this can damage the finish.
