Lloyd Flanders®

– LLOYD LOOM® –

In 1917, Marshall B. Lloyd patented a process of weaving cellulose strands into wicker fabric. Lloyd Flanders® has advanced the original technology producing a continuous strand that will not burr, crack, or peel resulting in a consistently smooth weave. Each strand in the fabric's warp is constructed of twisted cellulose fibers immersed in glue to prevent unraveling. In the weft, the strands are reinforced with aluminum wire for added strength and resilience. Following the weaving process, the wicker is completely submerged in a resin emulsion and baked to form a flexible coating which provides additional protection from moisture. The wicker is then contoured over a sturdy aluminum frame and is completed with our special Durium® finish ensuring years of use. This innovative manufacturing process allows Lloyd Flanders® to produce wicker furniture that is both versatile and durable. Coupled with upscale design and stylish comfort, it has quickly become the most sought-after all weather wicker furniture available today.

– FINISHES –

Lloyd Flanders® provides an extensive variety of beautiful and durable finishes developed especially for our Lloyd Loom® All Weather Wicker. Thanks to our unique Durium® Polyester Coating, a high performance finish designed to be both durable and flexible, we continues to lead the industry in innovative All Weather Wicker.

FRONTIER

LLOYD LOOM®

Inspired by the rugged beauty of the American West, the Frontier Collection offers a unique blend of rustic charm and modern technology. The aluminum frame is enhanced with a heat transfer faux-wood film to achieve the look of wood grain with less maintenance. These technologies not only enhance the aesthetic appeal but also contribute to a more sustainable and eco-friendly approach to design.
